Course Descriptions

[2022 \$10/class]

A History of Claims: What is the same, what is different?

An interesting look at the first insurance companies and how claims used to be handled and how they will be in the future.

After the Fire: A guide for victims and insurance professionals. What to do and not do after a loss.

Biohazard Claims: Not for the faint of heart.

Safely handling biohazard can be a challenge in your client's home or business. You will learn the why's and how's of this type of claim.

Claims: What Happens Next

Valuable information to help them you provide better support for clients as they go through the claims process.

Ethics. 8 Ways to Get There: Building a Strong Ethical Culture in Your Life and Where You Work.

Fire Claims: A hot mess.

See the challenges to reversing the chemical interactions caused by a fire. Learn through some interesting experiments and actual claims.

Hoarding Claims: A tough negotiation.

Learn the challenges of cleaning a hoarded home, both with the structure and the person who hoarded.

Mold Claims: Who is going to pay?

Challenging misconceptions about mold and how to remove it from a building. The answers will surprise you. Practical guidelines for doing this yourself.

Packouts: It's Just Stuff, but...

Some losses require a removal, or Packout, of the client's belongings in a home. An important review of how a company handles their prized possessions.

Tips on Managing Claims: Exploring the best ways to handle property claims.

Learn and share the best practices to make things go as smoothly as possible.

Water Claims: Here we go again.

Learn the best practices for restoring the most common type of claim and how to better insure your clients before it happens.

Cost of Each Course: \$10/class
