

In the Know: Spring Tips: Starting From the Top

April 2022

Spring Has Sprung: Are you ready?

Most everyone has heard the phrase... "spring cleaning" and to say the list is long may be an understatement. So, to help, we chose a few important tips that all start by looking up.

Gut the Gutters

Although leaves may fall in autumn, they can wreak havoc when spring showers pour down. Keeping gutters clear of debris helps to will avoid water back up in eaves or foundation. It's not just gutters. Downspouts can also get clogged or damaged which impedes their role in directing water away from a home or property.

Free the Flue

Somewhat a two-part task, step one – clearing the fireplace of charred logs and ash while using protective gear such as glasses, a mask and/or tarp. Then it is time for step two and calling in an experienced professional chimney sweeper – one that understands the dangers and has the equipment needed to complete the job.

Assess the Attic

When it comes to an attic, water and damage from it is often homeowners' first concern. Yet it is also the perfect place for insects to fester and animals to make it their home. Any signs of either or both require a professional to rid the pesky pests and keep them from coming back.

For questions or additional tips and resources, any ServiceMaster of Cherry Hill team member is available to address concerns.
